SCBA Decon Washer

Everything is clean and free from contamination in just a few minutes.

Contaminated Gear a Constant Health Risk. SCBA (Self Contained Breathing Apparatus) and protective gear is a life insurance for firemen and women. On an emergency call, soot particles and combustion gases are absorbed by the protective gear, contaminating it. Therefore, it's important to decontaminate it immediately upon return to the station.

Cleaning by Hand	VS	SCBA Decon Washer
30 minutes per set		8 minute cycle for SCBAs
Unprotected exposure to toxic residues on SCBA		Ergonomic process minimizes contact with contaminated materials
Prolonged exposure to toxins put firemen & women at a greater risk of cancer		Minimizes exposure with sealed, self-contained cleaning process

Solo Rescue® cleans SCBA smokediver gear (steel, composite, rubber, fabric, plastic etc.) from residues of combustion gases, soot particles and toxins in just a few minutes and contributes to a significantly improved working environment for rescue service personnel.

Developed In Close Contact With The Swedish Rescue Service to meet the needs for cleaning contaminated equipment in the best way possible. Solo Rescue has a specially adapted interior and accessories to ease the cleaning of SCBA, gloves, boots and helmets.
