

True Grit Industrial Hand Cleaner

Product can be used with or without water.

INDUSTRIAL STRENGTH HAND CLEANER THAT REMOVES EMBEDDED SOIL, GRIME & GREASE.

True Grit Industrial Hand Cleaner is a plant based hand cleaner created from adsorbent plant based scrubbers and soy solvents.

This product has two powerful cleaning agents, that no other hand cleaner on the market can match.

1. Soy based solvent dissolves oil and grease.
2. Absorbent and porous plant based scrubbers absorb the oil, grease and dirt.

True Grit Industrial Hand Cleaner has no pumice, walnut shells or plastic beads to abrade the hands or harmful petroleum solvent to dry the skin.
